

# Estimate costs

**Surprises are for parties,  
not dental costs**

No one should experience sticker-shock after receiving dental care — that's why Delta Dental<sup>1</sup> created a tool that allows enrollees to get estimated costs for typical dentist visits before even stepping foot in the office.

Cost Estimator shows the projected cost of an entire dentist visit, rather than just a single procedure, which can help enrollees plan dental treatment with more confidence. It can also show how using network dentists could lead to more savings.

The tool will default to the dentist most recently visited by the enrollee, but multiple dentists can be selected, both in- and out-of-network, to compare costs and savings.

Help your enrollees plan dental treatment with more confidence!

## By asking guiding questions, the tool offers:

- » A cost estimate for a dentist visit based on current eligibility for various procedures like checkups, filings and crowns.
- » A snapshot of typical submitted fees, the enrollee's typical costs and potential network savings.
- » A current benefits balance showing accruals toward any deductible, maximums and benefit limitations.<sup>2</sup>

## It helps groups and enrollees

The tool helps enrollees make sense of their dental care, and it can help you too. More cost transparency can mean less questions and less confusion about network dentists. By showing clear cost differences between visiting network dentists versus non-Delta Dental dentists, it encourages in-network utilization — which can even help keep your dental plan costs stable.
